Art Unit: 3681

Claims Allowed

Claims 1-25 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not anticipate nor render obvious the invention of a controller for an automatic start/stop of an internal combustion engine wherein the controller either stops the starter motor during cranking in order to determine an estimated inertia value of the rotation masses of the engine and drivetrain, or wherein the controller regulates an idle speed of the engine using a different control amount when the engine is automatically started versus when the engine is manually started.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art Discussed

The examiner has considered the references cited by applicant in his Information

Disclosure Statement filed April 15, 2004. None of the references show all of the features of the claimed invention.

The references cited by the examiner are deemed pertinent to applicant's disclosure.

Hirano '501 shows a method of estimating an inertia value of an internal combustion engine during starting by rotation the engine without ignition, but does not stop the starter motor as required by the claims. Kuroda '926 shows an automatic start/stop control for an engine which regulates an idle speed and is responsive to a transmission condition, but does not stop the engine

during cranking to estimate inertia, or control the idle speed using a different control amount when the engine is started by automatic or manual means.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dirk Wright whose telephone number is 703-308-2160. The examiner can normally be reached on Monday through Friday, 8AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Marmor can be reached on 703-308-0830. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
